

Proposal Guidelines

! ATTENTION

This section is not relevant for 2024

i Note

The subsection titles below are indicative

1. Introduction

- a. The context of the data, domain, and/or field of application.
- b. The source and/or reference of the data (where it was found, where/when it was previously used).
- c. The global objective of the project and data analysis (i.e., research question).

2. Data description

- a. The features: variable names, their description, their modality, etc.
- b. The instances: what they represent (unit of observation), how many, etc.
- c. Any planned cleaning or data modification: removing, imputation, modality merging, etc.

3. Planned analysis

- a. Supervised learning: models, splitting strategy, metrics, etc.
- b. (optional) Unsupervised learning: methods used, how they will interact with supervised learning.
